Only four types of organizations need to worry about data quality:

Those that care about their customers,
Those that care about profit and loss,
Those that care about their employees, and
Those that care about their futures.

Will this list provide the information you need? The format is different than an older version I have but looks to have the entire list of parameters.

Rich,
Attached is a table which contains the list of analytes as well as the reporting limits used at the Dimock Site. You will notice there are a couple analytes which we currently do not have any reporting limit (RL) information on. If this info is critical we can send out some e-mails and try to get an answer for you.
Thanks,

Suddha Graves
